Senior Full Stack Developer

Employment type: Permanent, Full Time

Millions of people worldwide are losing their sight unnecessarily. Join a mission driven award winning team who are intent on changing this.

---

**The Role**

The Dev Ops team is responsible for designing, developing and testing software solutions aligned with the strategic priorities of Peek as follows:

- Software requirement elaboration and decomposition
- Software design, development and testing
- Provision of 2nd and 3rd line technical support
- Assistance to Delivery in project design
- Infrastructure provisioning, systems management and monitoring

**Responsibilities and Attributes:**

As a Peek Senior Developer role, you will deliver world-changing products and must deliver impact. You will be an experienced developer and a team player, determined to take an active part in producing the highest quality outputs.

You will join a small, senior dev-ops team delivering full stack solutions from cross-platform mobile apps to cloud-hosted RESTful services.

Peek operates and delivers programmes in multiple countries. As such this role has the flexibility to be based in a variety of different locations, subject to complying with
right to work requirements. Travel to programmes using Peek in different countries will be part of the role. Peek’s culture enables a self managed team structure. This provides a high level of ownership and accountability within each role, and enables effective and frequent collaboration between team members and across teams.

The key attributes of the role are:

- Extremely strong JavaScript/Typescript skills with in-depth experience of Node-JS and/or Angular 2
- Comprehensive understanding of asynchronous programming
- A strong track record with automated testing and continuous integration
- Proven experience of the full software delivery lifecycle
- Commitment to Agile delivery

**Team** - Dev Ops

**Location** - London with some remote working.

**Travel** - occasional travel to our programme locations, depending on travel restrictions.

**About Peek**

Poor vision and blindness are the world’s most neglected disabilities. Millions of people worldwide are held back because they don’t live near eye health facilities or can’t access treatment. Most people affected by blindness and poor eyesight live in low- and middle-income countries, and young people, older people and women carry the greatest burden.

**Peek Vision** is a social enterprise which develops evidence-based smartphone tools to improve access to eye care. We develop software, hardware and data visualisations to help health services sustainably improve access to eye care. Peek is developing these systems with its partners to reach the people who most need access to eye care in low- and middle-income countries.

**Peek solutions** are based on smartphone technology and allow non-specialists - such as teachers and community health workers - to conduct **vision screening** and **eye health surveys** in **homes, communities** and **schools**. This generates real-time data allowing healthcare providers to understand where the need is greatest and how to improve services. Peek solutions are integrated with the award-winning **Peek Acuity** smartphone-based vision check, which allows anyone to check visual acuity using a smartphone.

Peek is an **impact-driven organisation**, always focused on the people and communities who can benefit the most from improved eye care. We have offices in Botswana, Kenya and the UK, and **our team** works with partners across the world to bring better vision and health to everybody. To find out more, visit **www.peekvision.org**.

To apply, please email CV and covering letter to Kate Box at **hr@peekvision.org**.
