

Peek's mission

Peek Vision is a social enterprise that powers eye health programme providers to strengthen systems & service delivery with a software & data intelligence platform. We make the invisible, visible in eye health services.

Why eye health matters

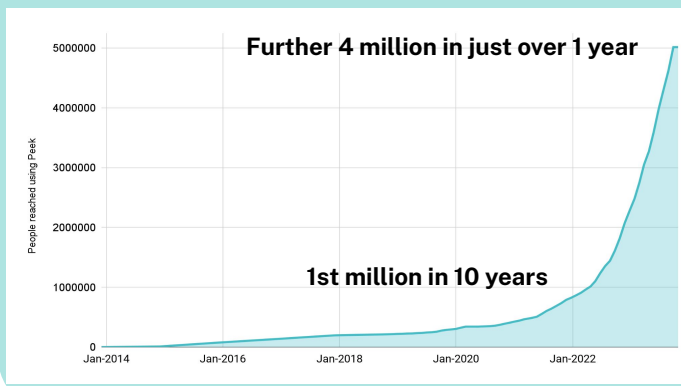

1.1 billion people live with avoidable or preventable vision loss. This number is set to grow to 1.8 billion by 2050. With Peek, eye health providers can identify and address gaps and inequalities in their services.

Correcting vision improves education outcomes and lifts families out of poverty. Providing glasses to workers can increase productivity by over 22% and wearing glasses can reduce the odds of a child failing a class by 44%.

Our Impact

Peek is currently powering 60 community and school eye health programmes across 12 countries in Asia and Africa. Service providers are reaching more than 380,000 people each month using Peek. We are scaling our impact:

It took us ten years to help our partners reach the 1st million people and just 14 months to reach a further three million people.

Strengthening systems

We have a national government-level contract in Botswana to screen and treat every schoolchild in the country. We have also started a large-scale (8 million people target population) programme in Kenya with CBM and the MoH. In Pakistan the multi-provincial programme reaches over 100,000 people monthly.

Why Peek?

1. We have a sole focus & strong expertise in public eye health.
2. We offer an end-to-end solution for integrated, scalable services from community to tertiary level.
3. Our approach is tried and tested in multiple countries & proven by peer-reviewed research, including 3 Lancet journal Randomised controlled trial publications.

Partner with us

Our solution works. It has been proven to strengthen eye health systems and is enabling government adoption and scale. Our momentum is growing; the potential for impact is unlimited. But there is still millions more people who need to be reached.

We need enterprising allies to make this happen. By supporting Peek, you will be part of a system-changing movement that will contribute to reaching the SDGs, grow economies and transform millions of lives.
